PATENT
Attorney Docket No. 209259

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:

Hattori et al.

Application No. 09/781,703

Art Unit: 1651

Examiner: I. Marx

Filed: February 12, 2001

For: STABLE PQQ-DEPENDENT
GLUCOSE DEHYDROGENASE
COMPOSITION

AMENDMENTS TO CLAIMS MADE IN
RESPONSE TO OFFICE ACTION DATED MAY 1, 2002

*(Deletions are indicated by crossed-out text,
while insertions are indicated by underlined text)*

1. (Amended) A stable lyophilized PQQ-dependent glucose dehydrogenase composition comprising a PQQ-dependent glucose dehydrogenase together with (i) at least one compound selected from the group consisting of aspartic acid, glutamic acid, α -ketoglutaric acid, malic acid, α -ketogluconic acid, α -cyclodextrin and their salts and (ii) an albumin, wherein the PQQ-dependent glucose dehydrogenase content is 100 to 2000 kU per gram of the composition.

3. (Amended) A method for stabilizing a PQQ-dependent glucose dehydrogenase, ~~wherein the~~ said method comprising (a) providing a PQQ-dependent glucose dehydrogenase is made to coexist and (b) forming a composition comprising the PQQ-dependent glucose dehydrogenase together with (i) at least one compound selected from the group consisting of aspartic acid, glutamic acid, α -ketoglutaric acid, malic acid, α -ketogluconic acid, α -cyclodextrin and their salts and (ii) an albumin, wherein the PQQ-dependent glucose dehydrogenase content is 100 to 2000 kU per gram of the total components calculated on a dry basis.

4. (Amended) The method according to claim 3, wherein the PQQ-dependent glucose dehydrogenase is ~~made to coexist further~~ present in the composition with a buffer.

For: STABLE PQQ-DEPENDENT
GLUCOSE DEHYDROGENASE
COMPOSITION

**PENDING CLAIMS AFTER AMENDMENTS
MADE IN RESPONSE TO OFFICE ACTION DATED MAY 1, 2002**

1. A stable lyophilized PQQ-dependent glucose dehydrogenase composition comprising a PQQ-dependent glucose dehydrogenase together with (i) at least one compound selected from the group consisting of aspartic acid, glutamic acid, α -ketoglutaric acid, malic acid, α -ketogluconic acid, α -cyclodextrin and their salts and (ii) an albumin, wherein the PQQ-dependent glucose dehydrogenase content is 100 to 2000 kU per gram of the composition.
2. The composition according to claim 1, which further contains a buffer.
3. A method for stabilizing a PQQ-dependent glucose dehydrogenase, said method comprising (a) providing a PQQ-dependent glucose dehydrogenase and (b) forming a composition comprising the PQQ-dependent glucose dehydrogenase together with (i) at least one compound selected from the group consisting of aspartic acid, glutamic acid, α -ketoglutaric acid, malic acid, α -ketogluconic acid, α -cyclodextrin and their salts and (ii) an albumin, wherein the PQQ-dependent glucose dehydrogenase content is 100 to 2000 kU per gram of the total components calculated on a dry basis.
4. The method according to claim 3, wherein the PQQ-dependent glucose dehydrogenase is present in the composition with a buffer.
